

7 SECRETS

to Break Into the C-Suite

Dear Leader,

Congratulations on getting started on your leadership journey to become a Global CXO. Welcome to our Global community of leaders.

I am on a **mission to empower a Million leaders to become CXO's**. In the past,

I have been a CXO who has worked for 3 decades in 5 countries. As an executive coach trained by John Mattone (coach to Steve Jobs), and an ICF -PCC coach I am globally certified and work with leaders across the world.

I teach from my personal life experience of being a Global CXO and integrate the scientific theories of the west with the meditation and mindfulness practices of the east. To democratise the Leadership journey, I have developed programs to cater to different price points as described below.

1) Global CXO Blueprint – Entry level (Silver membership)

2) Global CXO Challenge – Mid level (Gold Membership)

3) Global CXO Certification – Senior level, Group Coaching format (Diamond Membership).

4) Global CXO Mastermind - Advanced, 1 to 1 Coaching (Quantum membership for a year)

If you are a beginner, it's best to get started with the Global CXO Blueprint but if you are serious you should invest in the Global CXO Certification program.

When you invest at this level you automatically get all the programs below (Blueprint and Challenge) free with Lifelong access.

These programs are a system designed to deliver results.

Leaders have become CEOs and CXOs. They have got a 100% salary increase in new jobs, 50% increment in their existing jobs and those that did not have jobs when they joined, found jobs. Human beings fail, Systems don't.

You will get results proportionate to the effort you put in so kindly implement the learnings as fast as you can for best results. This is NOT a theory program to gather information but to implement information, hacks, and tips.

You are strongly recommended to subscribe to the LinkedIn Newsletter as well as the YouTube channel or instagram as there is a lot of new information on the CXO journey which is not in the course material.

INTRODUCTION

The Journey Beyond Expertise and Into New Realms of Understanding

I've had the privilege of sitting in executive rooms, guiding digital transformation, leading mission-driven organizations, and navigating both corporate chaos and clarity. Yet, I can tell you this: **no one is ever “tapped” for the C-suite just because they are smart, efficient, or well-liked.**

Breaking into the C-suite isn't about luck, timing, or waiting for someone to notice you. It's about making intentional choices, building powerful relationships, and mastering the skills that executives use to lead at scale. This book is your guide to that journey — **a mix of proven strategies, hard-earned lessons, secrets I've lived, and actionable steps to take you from where you are now to where you want to be.**

It's the mid-career professionals — those stuck somewhere between **“you're doing great”** and **“what's next?”** — who need this book the most. Because doing more won't get you there. But becoming more will.

Each chapter comes with exercises designed to help you reflect, act, and accelerate your progress. The goal is simple: to help you step confidently into your next chapter as a leader.

Let's begin.

CHAPTER 1

A man with short dark hair, wearing a dark suit jacket over a light-colored shirt, is speaking into a silver microphone. He is looking slightly to his right with a focused expression. The background is a dark blue stage with vertical light strips.

Truly Own Your Ambition — And Have the Courage to Say It Out Loud

"The question isn't who is going to let me;
it's who is going to stop me."

Ayn Rand

CHAPTER 1

Truly Own Your Ambition — And Have the Courage to Say It Out Loud

The Secret

Many dream of leading, but few admit it out loud. Fear of being seen as arrogant, naïve, or “too much” holds them back. The truth? The C-suite isn’t reserved for a chosen few — it’s for those brave enough to declare: **“I’m ready for more.”**

Why This Matters

Every executive journey starts with a decision, not a promotion. If you’re waiting to be discovered, you’re handing your future to chance. Ambition isn’t arrogance — **it’s a clear statement of intent.**

Ambition is not arrogance.

Ambition is not greed.

Ambition is the courage to say, **“I can do more, and I’m willing to carry the responsibility that comes with it.”**

The Inner Roadblocks That Keep You Small

If you’ve ever thought:

“Who am I to lead at that level?”

“What if I fail, and everyone sees it?”

“What if they think I’m full of myself?”

Know this: these aren’t signs of humility — they’re signs of fear, disguised as modesty. **And fear is a master at keeping brilliant, capable people stuck for years in the safe zone.**

Your New Frame: Ambition as Service

See ambition as **service**, not self-promotion. The higher you rise, the more lives you can positively impact. Your ambition becomes a responsibility — to lead with purpose and to multiply your impact. service Owing your ambition, then, isn't selfish. **It's your responsibility.**

Assignments for Chapter 1

1. The Declaration Test

- Write down your leadership ambition as a single, powerful sentence: "I will lead at the [X] level within [Y] years because [reason that matters]." Say it out loud to yourself every day for the next 30 days. This rewires your brain to see it as inevitable, not impossible.
- Watch how speaking it out loud changes how real it feels.

2. Your Ambition as Service

- Map List 5 ways your leadership at the next level could directly serve people — employees, customers, communities, industries.
- This shifts your focus from "What I get" to "What I give."

3. Find Your First Believer

- Share your ambition with one person you trust — a mentor, peer, or coach.

In Chapter 2, we'll unlock the art of *building strategic visibility* — so the right people not only know your name, but see you as the natural choice for bigger opportunities.

CHAPTER 2

Establish a Strong and Strategic Visibility

"Visibility creates opportunity."

Oprah Winfrey

CHAPTER 2

Establish a Strong and Strategic Visibility

The Secret

Talent alone won't get you noticed — not in today's crowded, fast-moving world. People can't champion what they can't see. **Visibility is the bridge between your potential and your opportunity.**

Why This Matters

The best leaders aren't just good at their jobs — they're known for being value-adding leaders. Strategic visibility gets you into the **right rooms, onto the right radars, and into the right conversations.**

The Inner Roadblocks

“I don't want to be a self-promoter.”

“My work should speak for itself.”

“I'm too busy doing the work to talk about it.”

These are comfort-zone excuses. In reality, **silence is invisibility** — and invisibility is career quicksand.

Your New Frame

Visibility is not bragging — **it's positioning**. Show up where it matters, contribute meaningfully, and ensure your value is known to those who can amplify it. Make your presence felt in meetings, industry events, online platforms, and leadership circles.

Also, develop **political intelligence** — that blend of empathy, tact, and strategic awareness that allows you to work with difficult personalities, bridge cultural divides, and unite competing agendas. Executives don't just solve problems; they navigate power structures with grace and confidence

When visibility meets value, you're no longer "one of many" — you become indispensable, impossible to ignore, and **ready for the next leap**.

Assignments for Chapter 2

1. Create Your Visibility Map

- List the top 10 internal and external stakeholders who could influence your career advancement.
- Score your current relationship with each (Low / Medium / High visibility).
- Set a target to move at least 3 relationships up by one level in the next 60 days

2. Design Your Visibility Moments

- Identify at least two upcoming meetings or events where you can add high-value insight.
- Prepare a 2–3 minute contribution that connects directly to strategic priorities

3. Story Your Wins

- Take one recent success and write it in a story format: context, challenge, your action, and the measurable impact.
- Share it in a team meeting, leadership forum, or LinkedIn post (adapted for the audience)

In Chapter 3, we'll unpack the art of building a — one that doesn't just open doors, but walks you through them

CHAPTER 3

Build a Strategic Network — The People Who Will Open Doors for You

"Your network is your net worth."

Porter Gale

CHAPTER 3

Build a Strategic Network — The People Who Will Open Doors for You

The Secret

The most successful executives don't just have networks — they cultivate them with intention. They know **who to connect with, how to build trust, and when to leverage those relationships for mutual success.**

Why This Matters

No major career leap happens in isolation. Opportunities, insights, and influence flow through people. The stronger and more strategic your network, the more doors will open — **often before they're even advertised.**

The Inner Roadblocks

“Networking feels fake.”

“I’m not the type to ask for favours.”

“I don’t have time to meet more people.”

These thoughts keep you stuck in a small circle.

A **limited network = limited opportunities.**

Your New Frame: Relationships as an Ecosystem

Networking isn't about collecting contacts — it's about creating value. Be genuinely curious, offer help before you ask for it, and focus on building **long-term partnerships** instead of short-term transactions.

Many leaders think networking is about collecting business cards or making small talk at events. In reality, **strategic networking is about building mutually valuable relationships with people who can influence your career trajectory — and whose success you can also accelerate**

Practical Ways to Build a Strategic Network

1. Start With Your “Hidden Circle”

- Make a list of 10–15 people you already know but haven't connected with deeply in years. Reconnect with genuine curiosity — not an immediate ask.

2. Show Up in Industry Spaces

- Attend (and speak at) conferences, panels, and webinars where your peers and senior leaders gather. Visibility here compounds your credibility.

3. Create Value Before You Need It

- Share insights, make introductions, offer help. Become known as a connector and a problem-solver long before you need support.

4. Turn Every Project Into a Networking Opportunity

- Share insights, make introductions, offer help. Become known as a connector and a problem-solver long before you need support.

Three Assignments to Build Your Strategic Network

1. The Relationship Map

- Draw three concentric circles: Mentors, Sponsors, Allies.
- Place people you know into the right circles. Identify gaps and start intentionally filling them.

2. The 5-5-5 Rule

- Each month, reach out to:
 - 5 existing contacts to maintain relationships
 - 5 dormant contacts to reignite connections
 - 5 new contacts to expand your network

3. The Give-First Commitment

- For every new person you connect with, commit to offering one piece of value — an introduction, a resource, or insight — before asking for anything in return.

Bridge to Chapter 4

When you combine ambition (Chapter 1), visibility (Chapter 2), and relationships (Chapter 3), you're already ahead of most of your peers. But there's a critical next step — **managing your leadership brand with precision** so people not only know, but also *what you stand for*.

CHAPTER 4

A man with dark hair, wearing a dark suit jacket over a light blue shirt, is smiling and looking towards the camera. He is holding an open book in front of him. The book's cover is visible, showing the title 'THE POWER OF' in large, bold, black letters. The background is a blurred indoor setting with warm lighting.

Craft Your Leadership Brand — Be Known for What You Stand For

"Your brand is what people say about you when you're not in the room."

Jeff Bezos

CHAPTER 4

Craft Your Leadership Brand — Be Known for What You Stand For

The Secret

You already have a reputation — the question is whether you're shaping it or letting others define it. Executives stand out because their brand **communicates clarity, credibility, and consistency.**

Why This Matters

The higher you rise, the less your work speaks for itself. People decide your value based on perception. A strong leadership brand ensures those **perceptions align with your vision and capabilities.**

The Inner Roadblocks

“My work should speak for itself.”

“I don't want to self-promote.”

“Branding is for products, not people.”

These beliefs keep you invisible. In reality, **a leadership brand is not vanity — it's strategy.**

Your New Frame

Define your brand around three pillars: **vision (what you stand for)**, **value (what you deliver)**, and **voice (how you communicate)**. Make sure every interaction — from meetings to LinkedIn — reflects that brand consistently.

The Brand Blindspot That Holds Leaders Back

Too many talented managers think: *If I just work hard and deliver results, my brand will take care of itself. It won't.*

At the executive level, is as important as performance. Without intentional brand building, you risk being:

- Overlooked for strategic roles because decision-makers “don’t know enough about you.”
- Misunderstood because you haven’t shaped the narrative of your career.
- Seen as tactical rather than visionary.

Three Assignments to Elevate Your Leadership Brand

1. The 3-Word Brand Test

- Pick three words that you want people to associate with you.
- Over the next month, act intentionally to reinforce those qualities in every meeting, presentation, and interaction.

2. The Impact Audit

- List your last five major projects or leadership moments. For each, note the visible results, the relationships strengthened, and the reputation boost you gained.

3. The Brand Consistency Check

- Review your LinkedIn, internal bio, and recent presentations. Are they telling the same story? If not, align them.

Bridge to Chapter 5

With a clear, consistent leadership brand, you're no longer just part of the organizational fabric — **you're someone people notice, remember, and advocate for.**

In **Chapter 5**, we'll tackle the next game-changer: **Developing Executive Presence** — the skill that makes people feel they're in the presence of a leader even before you speak.

CHAPTER 5

Master Executive Presence — Lead the Room Before You Speak

"Presence is more than just being there."

Malcolm Forbes

CHAPTER 5

Master Executive Presence — Lead the Room Before You Speak

The Secret

Executive presence is the unspoken “it” factor that makes people listen, trust, and follow you. It’s the mix of gravitas, communication, and confidence that signals: **I belong at the table.**

Why This Matters

At the executive level, decisions about you are often made when you’re not in the room. Executive presence makes sure those decisions are in your favor — because you’ve left an **impression of competence and credibility.**

The Inner Roadblocks

“I’m not naturally charismatic.”

“I don’t want to be the loudest voice in the room.”

“I’m worried about overstepping.”

Executive presence isn’t about volume or ego — it’s about **calm authority, clarity of message, and emotional intelligence.**

Your New Frame

Focus on how you show up: your posture, tone, and listening skills matter as much as your words. Share insights with precision. Handle challenges with composure. And remember — presence is built over consistent moments, not one big performance.

Executive presence is the bridge between *having the ability* and *being given the opportunity to lead at the highest level*.

The Misconceptions That Hold People Back

1. “Presence means Charisma”

Wrong. Charisma is a style; presence is a skill. You can learn it, refine it, and make it authentic to you.

2. “I need to speak more to be noticed.”

Presence is just as much about *listening with intent* as it is about speaking with impact.

3. “It’s about dressing the part.”

Appearance plays a role, but presence is built on consistency, gravitas, and the way you make others feel.

Real-Life Example

A senior VP once told me the moment her career turned was during a crisis meeting. She didn’t have all the answers, but she calmly reframed the problem, outlined the next two steps, and committed to an update in 24 hours.

Three Assignments to Build Executive Presence

1. The 30-Second Audit

- Record yourself walking into a room, introducing yourself, and sharing a brief point. Watch it back. What's your posture like? Voice? Energy?

2. Power Pause Practice

- In your next meeting, pause for 2–3 seconds before answering a question. Notice how it shifts the attention and authority to you.

3. The Gravitas Challenge

- Pick one upcoming meeting. Prepare three key points you want remembered — and deliver them with calm, deliberate confidence.

Bridge to Chapter 6

Once you own the room with your presence, the next step is to own the table with your influence.

In Chapter 6, we'll unlock how to ***master strategic influence*** — the skill that moves decision-makers, aligns competing interests, and opens doors to opportunities others never even see.

CHAPTER 6

A man with short dark hair, wearing a dark pinstripe suit, a white shirt, and a red tie, is speaking into a small microphone. He is looking slightly to his right. The background is blurred, showing what appears to be a stage or conference setting.

Master Strategic Influence — The Power to Move Decisions

"The key to successful leadership today is influence, not authority."

Ken Blanchard

CHAPTER 6

Master Strategic Influence — The Power to Move Decisions

The Secret

Influence is the ability to move people, ideas, and decisions — even without formal power. In the C-suite, your success depends less on the title you hold and **more on the relationships you build and the trust you earn.**

Why This Matters

Every major initiative needs buy-in across departments, personalities, and priorities. Influence ensures you're not just heard, but acted upon. **It's the silent force that gets things moving.**

The Inner Roadblocks

“I don't want to play politics.”

“I'll just let my work speak for itself.”

“I can't influence people who outrank me.”

Influence is not manipulation — it's aligning interests, framing ideas in ways others value, and creating mutual wins.

Your New Frame

See influence as a service. Understand what matters most to your stakeholders and position your ideas as enablers of their success. Build coalitions before you need them, and **you'll move faster when it counts.**

The Common Myths

1. "Influence means authority."

Wrong. Title alone doesn't inspire followership — trust and credibility do.

2. "I can convince people with facts alone."

Facts matter, but decisions are driven by emotion and justified by logic. You must connect with both.

3. "It's all about selling hard."

No. The best influencers create, not push — making others feel invested in the outcome.

How to Build Strategic Influence

1. Map the Decision-Making Network

- Identify formal decision-makers and the informal influencers behind them.

2. Understand Stakeholder Agendas

- List item #1 Ask: What do they really care about? Align your proposal with their objectives.

3. Build Trust Before You Need It

- Influence is earned in the everyday moments, not just in high-stakes presentations.

4. Tell the Story, Not Just the Data

- Translate your proposal into a clear, emotionally compelling narrative.

5. Create Early Wins

- Demonstrate value in small ways first. Build momentum and credibility.

Real-Life Example

I once coached a Director who wanted to roll out a new AI tool across 14 global markets. The first pitch failed — stakeholders saw it as “extra work” with unclear benefits.

We reframed the pitch around *their* goals — cost savings, efficiency, and competitive edge — and brought early adopters to share their success stories.

The second pitch? **It got unanimous approval and a bigger budget.**

Three Assignments to Build Your Influence Muscle

1. Stakeholder Influence Map

- List 5–7 key decision-makers and influencers in your world. Identify their top priorities and potential objections.

2. Reframe for Alignment

- Take a current idea you’re championing. Rewrite it from the perspective of each stakeholder, showing how it benefits them directly.

3. Influence Without Asking

- In your next meeting, amplify someone else’s idea by connecting it to the organization’s priorities. Build goodwill before you need support.

Bridge to Chapter 7

Once you master the art of influence, the final frontier is ensuring your leadership ***creates lasting impact*** — even after you’ve moved on.

In **Chapter 7**, we’ll explore ***Legacy Leadership*** — how to build systems, people, and results that stand the test of time.

CHAPTER 7

Lead for Legacy — Build Impact That Outlasts You

"The greatest use of life is to spend it
for something that will outlast it."

William James

CHAPTER 7

Lead for Legacy — Build Impact That Outlasts You

The Secret

True leadership isn't measured by quarterly results — it's measured by the lasting change you create. Legacy leaders think **beyond their tenure, shaping cultures, people, and systems that thrive long after they've moved on.**

Why This Matters

Titles fade, but the impact you leave behind can define industries, careers, and communities. Leading for legacy shifts your focus from **short-term wins to enduring influence.**

The Inner Roadblocks

“I just need to hit my current targets.”

“Legacy is for people at the end of their careers.”

“I can't think long-term with so many daily fires to fight.”

Your New Frame

You build legacy every day — in every decision, hire, and conversation. Think about the leaders you most respect. Their greatness lies in what they built for others, **not just for themselves.**

How to Build a Leadership Legacy

1. Codify Your Playbook

Document processes, decision criteria, and best practices so they can be repeated without you.

2. Invest in Successors

Identify high-potential leaders and give them real responsibility now.

3. Build Cultural Anchors

Create rituals, values, and ways of working that reinforce performance and collaboration.

4. Think Generationally

Measure success not just by quarterly results but by how the organisation is positioned for the next 5–10 years.

Real-Life Example

One of my clients, a COO, decided his legacy wasn't "record-breaking revenue" — it was building a leadership pipeline that could out-**innovate the competition for years.**

He created a 12-month rotation program for rising leaders, documented the company's innovation playbook, and set up quarterly culture reviews.

When he left, **the systems and talent he nurtured kept delivering breakthroughs.**

Three Assignments to Build Executive Presence

1. The Tomorrow Test

- Write down what would keep running seamlessly if you left tomorrow — and what would collapse. That's where you need to focus.

2. Name Your Multipliers

- List 3–5 people you can invest in over the next year to carry forward your vision.

3. Design a Cultural Ritual

- Create one repeatable practice (e.g., innovation days, customer story sessions) that reinforces your values and will endure after you've moved on.

CONCLUSION

Reaching the C-suite is not the end goal — it's the start of leading with the greatest impact possible. The journey you take to get there will shape the leader you become. You'll face challenges, you'll have moments of doubt, but **each step you take intentionally will move you closer to becoming the leader your organization — and the world — needs.**

Remember: the C-suite isn't a prize to be won. It's a platform for influence, transformation, and legacy. **Own your ambition, act with courage, and lead with purpose.**
